READ THE LATEST NEWS! The Southerner PATENT HOT AIR

And Complete Cooking

It Requires Less Wood for Baking than is consumed in kindling fires in ordinary oven ONE CORD OF HARD WOOD

Will be sufficient to cook in it for a family a whole year. It cooks in about one half the time ordinarily required, and the heat is regulated with such precision that scarcely any skill or care is necessary to cook with absolute perfection. Meats are roasted thorsugally with the most desirable uniformity, and come from it to the table julicy and tender. Bread is baked with or without a hard crust, as desired, and will remain fresh and soft much longer than bread baked in other overs. Another very important advantage is, that it stove when cooking ordinarily given out so little he to the surrounding air that it will not kindle friction matches laid upon it, so that in summer it scarce heats the room at all; but in winter, by opening a cot the doors, it will heat the room with about of fourth the wood required by any stove in use. I sale by MACKENZIE & MINCHIN, Agents for the Patentees.
